

SCG Gateway: a simple route to high-performance connectivity

Meeting modern broadband demands doesn't have to mean greater complexity or cost.

SCG Gateway is an innovative router tailored to the specific requirements of our broadband customers. It combines ease of use with the robustness necessary to meet the increasing bandwidth requirements driven by multigigabit FTTP networks.

Why SCG Gateway:

- ✓ Out of the box compatibility with all SCG broadband circuits
- ✓ Simple, plug and play installation
- ✓ Supports high-bandwidth FTTP requirements up to 10 Gbps with market-leading technology

SCG Gateway: a simple route to high-performance connectivity

Key features:

- ✓ Ultra-fast broadband connectivity, with 2.5G/10G WAN interfaces and support for SOGEA/SOADSL connections
- ✓ Fast plug-and-play using Zero Touch Provisioning
- ✓ Reliable wired connectivity with four Gigabit Ethernet LAN ports
- ✓ Built-in next-generation wireless performance with the latest WiFi 7 (802.11be) standard
- ✓ Essential network control and security with NAT, DHCP, port forwarding, inbound filtering and up to three LAN VLANs
- ✓ Futureproof internet support with dual-stack IPv4 and IPv6* compatibility
- ✓ Remote software assurance and automatic security updates

*IPv6 support coming soon.
